

03/30/2011

When I had a motorcycle accident, I was severely injured and could not explain to the police officer what happened, so the police officer listed me as at fault. This led the insurance company to deny my claim, leaving me with horrific injuries, unable to work, and with no way to get the medical care I needed.

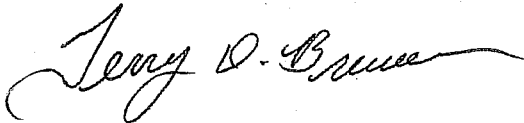

Fortunately, the Robson Law Firm believed me when I told them I was not at fault. They conducted their own investigation and even hired expensive engineering experts to prove that the accident truly wasn't my fault. My attorneys also got me expensive medical care to help me recover from my injuries and get my life back in order.

The Robson Law Firm got the insurance company to accept responsibility for the claim and offer me \$1 million dollars at mediation. My attorneys thought I could do better and they were right. A few months later, they convinced the insurance company to pay me \$1.2 million!

Thank you for everything.

God Bless,

Terry Brewer
